## WORK

### **Technology Consultant** (Contract based) (2016 - Present)

- Working with several clients to build and maintain their E-commerce products, SaaS products, and other bespoke solutions
- Working in tandem with *MITSHI INDIA LIMITED* (Listed on the Bombay Stock Exchange since 28 years).
- Enabling team members to produce their highest quality work while at the same time ensuring that we're building the product right and also that we're building the right products
- Creating product roadmaps, testing out ideas, building MVPs, researching about potential markets
- Hands-on development working with the following technologies to build and maintain products
  - Python, Django, Wagtail, & Postgresql
  - React, Tailwind CSS, Webpack, React-Native
  - Terraform, Packer, Ansible, DigitalOcean, AWS
  - Automating infrastructure with GitHub actions and in-house CI/CD tool

### **Co-Founder / CTO** at Taaza Kitchen Enterprises (2018 - 20)

- Grew the company from 2 employees to over 15, from \$0 to \$150,000 ARR. Managed sales, marketing, brand awareness, customer acquisition, and customer support
- Developed a production ready Django e-Commerce platform built from scratch. Managed a team to build the entire platform including Front End design, Database Design, Back end development, Automated Rolling Deployment Using AWS, Ansible, Terraform, & Packer. Also launched and promoted Android & iOS Apps

## FOSS PROJECTS

**sakura** ([github](https://github.com)) - (over 2,800 stars on GitHub) A drop in css framework which works out of the box on your entire site without having to change anything in your existing HTML files. It works directly on inbuilt HTML tags and is completely responsive for mobile usage. Supports duo-tone color customization.

**Better** ([github](https://github.com)) - Entry for #FossHack2020. A browser extension that suggests better/ethical/local/cheaper alternative products & services than your current tab's URL. The idea is to encourage competition and consumer choice. Our default list of alternatives is built from sources like [prism-break.org/en](https://prism-break.org/en)

**Genox** ([github](https://github.com)) - A fast & forkable static site generator powering <https://oxal.org> and many more websites

## EDUCATION & ACTIVITIES

- B.E in **Computer Engineering** - Mumbai University (GPA: 8.03 out of 10.00)
  - Developed an A.I. which uses human evolution and neural networks to learn and play games on its own. Simulations were developed using Neuroevolution of augmenting topologies.
