WORK

Developer Advocate *at MITSHI INDIA LIMITED (Contract based) (July 2020 - Present)*

- Talking with Developers & Designers daily to understand their problems, figure out solutions, and to get them to adopt and use the technology platform solutions developed by MITSHI
- I'm helping build a huge network of Developers & Designers to adopt and use technology platform solutions developed by MITSHI.
- Figuring out critical business requirements based on my interaction with freelancers and agencies so that our products are a win-win solution for them

Senior Technical Consultant *at MITSHI INDIA LIMITED (Contract based) (2016 - Present)*

- Working with MITSHI's in-house team to handle their E-commerce products. Managing a team of 4 developers, enabling them to produce their highest quality work while at the same time ensuring that we're building the product right and also that we're building the right products
- Creating product roadmaps, testing out ideas, researching about potential markets
- Hands-on development for building products for MITSHI's clients, building MVPs, automating infrastructure with CI/CD

Co-Founder / CTO *at Taaza Kitchen Enterprises (2018 - 20)*

- Grew the company from 2 employees to over 15, from $0 to $150,000 ARR. Managed sales, marketing, brand awareness, customer acquisition, and customer support
- Developed a production ready Django e-Commerce platform built from scratch. Managed a team to build the entire platform including Front End design, Database Design, Back end development, Automated Rolling Deployment Using AWS, Ansible, Terraform, & Packer. Also launched and promoted Android & iOS Apps

FOSS PROJECTS

sakura (github) - (over 2,800 stars on GitHub) A drop in css framework which works out of the box on your entire site without having to change anything in your existing HTML files. It works directly on inbuilt HTML tags and is completely responsive for mobile usage. Supports duo-tone color customization.

Better (github) **-** Browser extension that suggests better/ethical/local/cheaper alternative products & services than your current tab's URL. The idea is to encourage competition and consumer choice. Our default list of alternatives is built from sources like switching.software and prism-break.org/en

EDUCATION & ACTIVITIES

- B.E in **Computer Engineering** - Mumbai University (*GPA: 8.03 out of 10.00*)
  - Developed an A.I. which uses human evolution and neural networks to learn and play games on its own. Simulations were developed using Neuroevolution of augmenting topologies.
- Technical Blog: computableverse.com/blog/
- Personal blog: oxal.org/blog/
- StackOverflow: Ranked among the Top 12% contributors this year to StackOverflow #SoReadyToHelp
- Active member in Indian communities like DnH, IVG, and GSIUXD
